

VIVO  CARE

# VivoCare<sup>®</sup> Wound

Product information

VivoCare® supports you in the management of acute and chronic wounds. Discover how our wound care software can help you streamline processes and improve the quality of wound documentation

## CASE MANAGEMENT

Features that provide comprehensive support for organising wound care and case management. With our **user-friendly platform**, you can manage all relevant information centrally and access it at any time.

Using the **product search function**, you can ensure that all necessary treatment instructions and dressing materials are efficiently documented and managed. This not only facilitates communication between the professionals involved, but also **ensures complete traceability**.

Another key feature of our software is **digital reports**, which help

you keep track of your patients' healing progress. They are clear and easy to customise, allowing you to tailor them to individual needs and requirements.

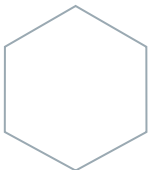

Our software makes monitoring progress a breeze. You can easily document and analyse progress and changes in wound healing to ensure the best possible treatment for your patients.

## CALENDAR

The **integrated calendar** helps you keep track of all your important appointments. Whether it's treatments at your specialist practice, home visits, visits to care homes or training sessions – with our calendar, you can see everything at a glance and make the most of your time.

Manage your resources efficiently and without conflicts at all times with the help of VivoCare® **resource planning**. In addition, our **appointment management system** offers a **user-friendly way** to schedule, change, reschedule or cancel appointments on behalf of the patient.

## PLANIMETRY

Revolutionise your wound care with the **automatic wound measurement** feature integrated into VivoCare®.

This feature helps you to **assess** wounds **quickly** and **accurately**. This **saves you time** and **improves the accuracy** of your documentation.

The software automatically calculates the **wound length, width and area**, allowing you to focus on what matters most – providing the best possible care for your patients.

By accurately measuring wounds, you not only gain a clear overview of the healing process but can also make targeted treatment decisions.

Thanks to our user-friendly interface, using the automatic wound measurement feature is intuitive and straight forward. Say goodbye to time-consuming manual measurements and benefit from **efficient and precise documentation**.

# VivoCare® Wound

## ORDERS

The integrated wound assessment tool enables you to accurately assess and document the condition of your patients' wounds. Your comprehensive analysis helps you to draw up a **personalised care plan**.

With the care plan, you can develop targeted treatment strategies tailored to the specific needs of each patient. Furthermore, our software enables quick and **easy processing of orders** for required materials and products.

You can place orders directly from the care plans across all patients, which significantly simplifies and speeds up the entire process.

## PATIENT APP

Set new standards in wound care. Use the VivoCare® Patient App to enable your patients and their carers to play an active role in the treatment process.

The Patient App offers a wide range of features that facilitate **communication between patients and healthcare** professionals. Patients can access their scheduled appointments, view their personalised treatment plan and also assess the quality of their wound care. This not only fosters trust but also encourages patients and their representatives to take ownership of their treatment.

With our wound care software and the integrated patient app, you can establish transparent and **effective communication** that significantly improves the quality of wound care.

## INVOLVEMENT OF THE TREATING PHYSICIAN

Take advantage of the option to directly **involve the treating physician** in the **documentation**. This feature facilitates effective communication and collaboration between wound care specialists and treating physicians, ensuring that all parties are always kept up to date on the current status of wound care.

With **customisable access** to parts of the documentation, you can specify exactly which information is accessible to the treating doctors.

## PRESCRIPTION

The **prescription request** feature is a key function of the software, enabling you to prepare personalised prescriptions for your patients quickly and easily. With just a few clicks, you can enter all the necessary information and **generate** an accurate **draft prescription**.

Furthermore, our software makes the prescription request process considerably easier. You can send prescription drafts **directly to the doctor responsible for the treatment**, which speeds up the entire approval process.

## BILLING

VivoCare® enables **quick and easy billing** to payers and patients. **All billing-related information** can be transferred **digitally** via export to various financial accounting systems. This **saves time** and **reduces administrative workload**.

## MANAGEMENT ACCOUNTING

Stay on top of things at all times and generate key performance indicators at the touch of a button.

**Comprehensive statistical analyses** provide you with valuable insights into how your team works and your patients' wound healing processes. This data enables you to spot trends, **identify areas for improvement** and make informed decisions.

Our statistical and analytical tools help you use your **resources efficiently** and **improve the financial performance** of your facility.

We look forward to supporting you on your journey  
with our VivoCare® software!
